Amendments to the Claims:

This listing of claims will replace all prior versions and listing of claims in the application.

Listing of Claims:

1-12. Canceled

13. (Currently Amended) An apparatus for the decomposition of fluorine compounds including SF₆ or NF₃, comprising a reactor having a catalyst for decomposing said fluorine compounds and a catalyst for the decomposition of at least one of CO, SO₂F₂ erand N₂O charged therein; a heater for heating said catalysts in said a-reactor; a moisture supplying unit for adding moisture to said fluorine compounds supplied to said reactor; an oxygen supplying unit for adding oxygen or an oxygen-containing gas; and an inert gas supplying unit for adding an inert gas as a dilutent gas,

wherein said reactor having said catalyst for decomposing said fluorine compounds charged upstream therein and said catalyst for the decomposition of at least one of CO, SO_2F_2 erand N_2O charged downstream therein.

14. (Currently Amended) An apparatus for the decomposing a-fluorine compounds comprising a reactor having a catalyst for decomposing said fluorine compounds including SF₆ or NF₃ charged upstream therein and a catalyst for the

Appl. No. 09/936,426 Amendment dated May 10, 2005 Reply to Office Action of February 10, 2005

decomposition of at least one of CO, SO₂F₂ erand N₂O formed by said decomposition charged downstream therein; a heater for heating said catalysts in said reactor; a moisture supplying unit for adding moisture to said fluorine compound supplied to said reactor; an inert gas supplying unit for adding an inert gas as a dilutent gas; and an oxygen supplying unit for adding oxygen or an oxygen-containing gas to a gas containing at least one of HF, CO, SO₂F₂ and N₂O formed by decomposition of said fluorine compounds.

- 15. (Currently Amended) An apparatus for the decomposing a-fluorine compounds including SF₆ or NF₃ comprising an apparatus for the decomposition of and removing of SO₂F₂ from a gas containing SO₂F₂ comprising a reactor having an SO₂F₂ decomposition catalyst charged therein; and means for adding water and oxygen to said gas supplied to said reactor.
- 16. (Currently Amended) An apparatus for the decomposing a-fluorine compounds as claimed in claim 13, wherein said catalyst for the decomposition of at least one of CO, SO₂F₂ erand N₂O contains at least one selected from Pd, Pt, Cu, Mn, Fe, Co, Rh, Ir and Au in the form of a metal or an oxide.
- 17. (Currently Amended) An apparatus for the decomposing a-fluorine compounds as claimed in claim 13, wherein said catalyst for the decomposition of at

NIP-247

Appl. No. 09/936,426 Amendment dated May 10, 2005 Reply to Office Action of February 10, 2005

least one of CO, SO₂F₂ erand N₂O is selected from a catalyst of Pd and La carried on alumina, a catalyst of Pt and La carried on alumina, a catalyst of Rh and La carried on alumina, a catalyst of Au and La carried on alumina, a catalyst of Ir and La carried on alumina, a catalyst of Pd carried on alumina, a catalyst of Pt carried on alumina, a catalyst of Cu carried on alumina, a catalyst of Mn carried on alumina, a catalyst of Pd and W carried on titania and a catalyst of Co carried on alumina.

- 18. (Currently Amended) An apparatus for the decomposing a-fluorine compounds as claimed in claim 13, wherein said apparatus-further comprises comprising a gas scrubbing tower for removing hydrogen fluoride and other water soluble components from a gas discharged from said reactor by contacting said gas with water or an alkaline aqueous solution.
- 19. (New) An apparatus according to claim 13, wherein said catalyst for decomposing fluorine compounds includes a combination of aluminum and nickel in the form of an oxide.
- 20. (New) An apparatus according to claim 14, wherein said catalyst for decomposing fluorine compounds includes a combination of aluminum and nickel in the form of an oxide.
